Dear Haim,

Enclosed is some literature about a solar refrigerator which might suggest an industry for the mitspeh.

Our applications for aliyah will be completed as soon as we get our medical examinations at the end of this month except for one thing: Gil Vardi wants letters of acceptance from you and Nezer Menuhin to accompany our applications. It took a few months to get appointments for the physicals, but we are pushing our applications in case we find a way to leave earlier than next year. Nezer told us at the kinus that we would hear from him in a few weeks, but we've heard nothing yet.

Jean has done about all she can do on the newsletter. Reports from Gad Ben-Ami and Steve Hoffman just arrived and she is readying them so the newsletter can be mailed to you by the first of next week. You can then edit it as you wish for printing.

Dear Haim,

April 14

Since we finished the summary of the questionnaires, that completes the newsletter as I see it. You'll note that I'm a lousy typist; there is a distinct limit to how much typing I can do, so the excerpts from "Region 2000" will have to be retyped on single sheets for copying, and those pages with too many typos can be redone if you have the help. I thought it was important to get the whole thing to you for any corrections, additions, or subtractions you may want to make. The pages are arranged in my suggested order, according to the table of contents as I saw it, but the pages are as yet unnumbered in case you have changes to make. Also the pages are back to back to show consecutive order after they are put on both sides of each page. We refolded the oversize sheets of site plans so that one end would be fastened in and the other open out freely.

Also please note that the map of Region 2000 is in the Table of Contents but I did not get to make a copy of it to put in the newsletter as the concluding two pages. I presume you can do this in your office.

Hope I haven't missed anything drastic. Good luck and regards to Ruby, and your family.
