

THE ZEOPOWER COMPANY

75 MIDDLESEX AVENUE, NATICK, MASSACHUSETTS 01760 - (617) 655-4125 • 235-4254

March 1, 1984

Mr. Edward Ryden
2975 Sonoma Mt. Road
Petaluma, CA 94952

Dear Mr. Ryden:

Thank you for your interest in our solar energy products.

The Model SR-3 solar powered refrigerator is an evaluation unit with a calibrated glass storage tank-evaporator; the ice that forms inside the hermetically-sealed system can be viewed and measured. While this ice is not accessible, future models will have a freezer compartment for ice production and food freezing. The Model SR-3 is made operational before it leaves our plant and cannot be modified or retrofitted. While the solar refrigerator is ideal for boats, recreational vehicles and mobile homes we cannot, unfortunately, provide custom units for individuals.

Prices: Model SR-3 Solar Refrigerator.....\$2,000.00
 Model IC-5 Integrated Collector.....\$2,000.00

Prices are F.O.B. plant. All crating, shipping and related charges are additional. Consult plant for quantity pricing. Advance payment is required for all overseas orders. Shipment is approximately twelve (12) weeks after receipt of order.

Present pricing reflects the cost of manual fabrication and assembly. When introduced into mass production, unit cost reductions of two-thirds are anticipated.

Sincerely,

Peter Downing
Business Manager
