

Shavuot Holiday

Yummy...

With the kids

Snowy road

The Har Halutz population continues to grow and planning for the next neighborhood is underway. We have recently completed a 2 year process defining our needs and planning the social, religious and cultural center. This area will include a new youth/sports center and community hall connected by a network of pedestrian and bicycle paths. The design integrates into the natural beauty and terrain of the Galilee landscape. A building fund has been established and we are seeking financial support for these projects.

1. A new youth and sport center
2. A new community building
3. Renovation and expansion of the existing synagogue and library
4. Conversion of existing office building for public uses
5. Development of a sports field

As one of the only settlements in the region founded by North Americans, Har Halutz has been developing a softball/little league field. This is the first of its kind in the central Galilee region. The plans are for this field to be developed as a dual use softball and soccer field.
